`style=chem-acs`

- Citations are numbered in order of first citation: in brackets in the text, [1], or as superscripts (see Special Instructions); the reference list puts the numbers in parentheses.
- Family name first, then initials, with semicolons between authors: *Knuth, D. E.; Plass, M. F.*
- Journal name italic, year bold, volume italic: *Software: Practice and Experience* **1981**, *11*, 1119–1184.
- Books: *Title*, edition; Publisher: City, Year.

In references.bib: type titles in title case, with braces around names and acronyms (`{NumPy}`), and journal names in full. This style leaves out article titles.

Special Instructions: Here `\cite` gives numbers in parentheses in the reference list and in brackets in the text. ACS journals print superscripts, which `\autocite` gives: "Knuth and Plass[1] showed". A superscript is not a word, so never write "Reference[4] shows".

In the text: an article [1]; page 23 of a book [2, p 23].
