`style=njit-ama`

- Citations are superscript numbers in order of first citation, placed after periods and commas. A page goes in parentheses: [1(p23)].
- Family name, then initials without periods, with commas between authors: Knuth DE, Plass MF.
- Up to six authors are listed; with seven or more, the first three are followed by "et al."
- Journal and book titles are italic.
- An article ends with year, volume, issue, and pages, with a hyphen: *1981;11(11):1119-1184*. Books give the publisher and year but no city.

In references.bib: type titles in title case, with braces around names and acronyms (`{NumPy}`), and journal names in full. This style changes article titles to sentence case.

Special Instructions: Cite with `\autocite`, as this page does, and type it before a period or comma; the number then moves after the punctuation. A superscript is not a word: write "Knuth and Plass[4] showed", never "Reference[4] shows".

In the text: an article;[1] page 23 of a book.[2(p23)]
