`style=njit-harvard`

- Citations give the author and year in parentheses: (Knuth and Plass 1981).
- Harvard is a family of similar styles. The template's `njit-harvard` follows Cite Them Right, the guide in Appendix B of the sample.
- Family name, then initials; the year, in parentheses, follows the authors. Article titles are in quotation marks; book and journal titles are italic.
- The reference list is in alphabetical order, with no numbers.

In references.bib: type titles in title case, with braces around names and acronyms (`{NumPy}`), and journal names in full. This style changes article and book titles to sentence case.

Special Instructions: `\cite` omits the parentheses, so this page cites with `\autocite`; when the authors are part of the sentence, use `\textcite`: "Knuth and Plass (1981) showed".

In the text: an article (Knuth and Plass 1981); page 23 of a book (Lamport 1994, p. 23).
