`style=njit-aip`

- Citations are numbered in order of first citation, in square brackets, [1], or as superscripts (see Special Instructions).
- Initials come first (D. E. Knuth); article titles are in quotation marks; journal names are not italic.
- An article ends with *11, 1119–1184 (1981)*; a book ends with *(Publisher, City, Year)*.

In references.bib: type titles in title case, with braces around names and acronyms (`{NumPy}`), and journal names in full. This style changes article titles to sentence case.

Special Instructions: Here `\cite` gives numbers in square brackets. Many AIP journals print superscripts, which `\autocite` gives: "Knuth and Plass[4] showed"". A superscript is not a word, so never write "Reference[4] shows".
